PERSONAL PROJECTS

Millionaire Quiz App (07/2023 - Present)

- **Description:** Developed a dynamic and engaging web application using React.js, HTML, CSS, and JavaScript, inspired by the popular TV show "Who Wants to Be a Millionaire."
- **Technology Used:** HTML | CSS | Javascript | React Js | Audio API
- **Outcome:** The "Millionaire Quiz App" project showcases my proficiency in front-end web development using modern web technologies. It demonstrates my ability to create interactive and visually appealing web applications while incorporating third-party APIs to enhance the user experience. This project also highlights my teamwork and problem-solving skills in a collaborative development environment.

ToDo List App (09/2023 - Present)

- **Description:** I developed a ToDo List web application using the Angular framework. The Project aimed to provide a user-friendly and efficient solution for managing tasks and to-do items.
- **Technology Used:** Angular | HTML | CSS | TypeScript | jQuery | Ajax | Local storage
- **Outcome:** Successfully developed a ToDo List App that served as a practical demonstration of my front-end development abilities. I implemented functionality for adding, editing, and deleting tasks, as well as marking tasks as complete. I Strengthened my problem-solving skills by addressing various challenges encountered during development.
